Summary

Full Stack Web Developer with extensive experience in customer service. Graduated from the University of Arizona Full Stack Web Development Bootcamp with comprehensive skills in Git, JavaScript, JQuery, HTML5, CSS3, ReactJS and Node.js. Excel at working in a team environment as well as on individual projects. Passionate about creating websites and applications that are dynamic and user friendly.

Technical Skills

Languages: Git commands, JavaScript, JQuery, HTML, CSS, Node.js, React, MySQL
Proficient with Tools: Bootstrap, Handlebars, Sequelize, Express

Projects

Multipass | https://github.com/getHashSet/Project-1 | https://gethashset.github.io/Project-1/
Team project created a tool for people to use while in a Bootcamp for computer coding. The application gives the user a start up for HTML and CSS to use Bootstrap, JavaScript, and JQuery in their application. It also, shows some fun with API's. Last but not least is the Read.me generator to make the documentation easy to create.

Chracker | http://glacial-fortress-86385.herokuapp.com/login | https://github.com/chrisducey01/Project2
Team project a user-friendly application for parents to create chores for their children to do. The application uses authentication and data bases to log the users children as well as create chores. The parent can create a login per child and assign chores to each child, and assign a date to be done; also delete the chore at their discretion. The child can then login and update the chore as it is completed.
